How TTicodes work

How TTI codes work

- TTI/ETOA members on purchasing TTIcodes gain access to the entire TTIcodes database (currently 215,000+ hotels)
- Provided with a download of the database and a utility that will enable a customer to maintain an up to-date copy of TTI Codes in their own environment
- Or they can also access the master TTI Codes database via an OTA compliant XML message set
- TTIcodes customers can submit to GIATA their hotel database in an agreed File Delimited or Excel format to add any hotels that are not yet in TTIcodes database

Matching the Database to your Properties

- Implementation process initiated on contract signature & payment
- Customer send lists of their properties to GIATA for matching and coding

How it works (Continued)

- GIATA provides daily updates as new hotels are added to the database or details of existing hotels whose information has been changed
- If purchasing TTICodes Plus, GIATA continually updates changes to the Hotel cross-reference information for Tour Operators, Wholesalers, OTAs, GDS & 3rd Party distribution companies with whom the hotel does business
- GIATA immediately makes these changes available to purchasers of TTI Codes Plus as part of the daily updates either via the Web Based Utility or an XML message set

XML Utility De-Duped Properties

- GIATA will from time to time comes cross duplicate entries in the TTIcodes database through its continual quality control procedures
- To check which properties have been de-duped one uses the “**Moved**” filter which identifies which properties are a duplicate of another.
- The message will identify which is the duplicate and what is the master entry (Moved To) as per the following example

Typical XML Utility Response

Example 4 - De Duping Properties since a specific date

e.g. moved since 2012-01-21

In Conclusion

- TTlcodes will revolutionise the way travel companies and hotels and other accommodation types handle multiple feeds
 - Simplifying de-duplication and providing huge efficiency gains
 - Knowing who is connected to who
- The exciting aspect is the roll out of TTlcodes to the entire travel and hospitality industry
 - As TTlcodes come into widespread use, they will become the single most important global identifier for hotels and other accommodation
